One System, Multiple Solutions

- Translation
- Audible Output
- Large Print
- Braille

ScripAbility prescription accessibility system helps you meet the needs of your customers by providing Braille, audible output, large print and translations in one easy-to-use, cost-effective solution.

Windows-compatible software quickly transfers patient data from your system to any of the ScripAbility formats. Accessible information includes patient name, drug name, dosage and instructions, prescription number, date, pharmacy information and warnings. Fast production and verification make it simple and reliable. The small hardware footprint takes little counter space.

Find out more by calling 1-800-890-1180 today!
