

Meet the Smoother, More Efficient

BrailleRx™

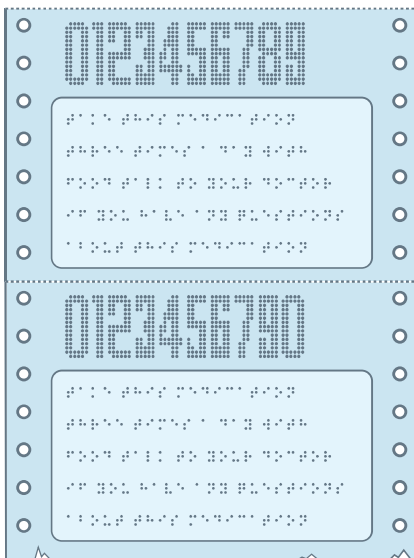

14.13 inches

11.2 inches

Easier Orientation

The graphic representation of the Rx number gives the pharmacist peace-of-mind that they are placing the label correctly.

Saves Time

Features a full 2.25" x 4.25" Braille label and eliminates row-by-row placement — saving up to 15 minutes per prescription.

Better Readability

Placing the information onto one label means the patient has an easier time reading the Braille label.

Ensures Medication Adherence & Safety

These labels help ensure compliance and adherence. They allow for quick medication identification and are often used together with ScripTalk Talking Labels for accessing all of the information on the legal label.
